

AMERICAN EROSION
CONTROL SUPPLY, INC.

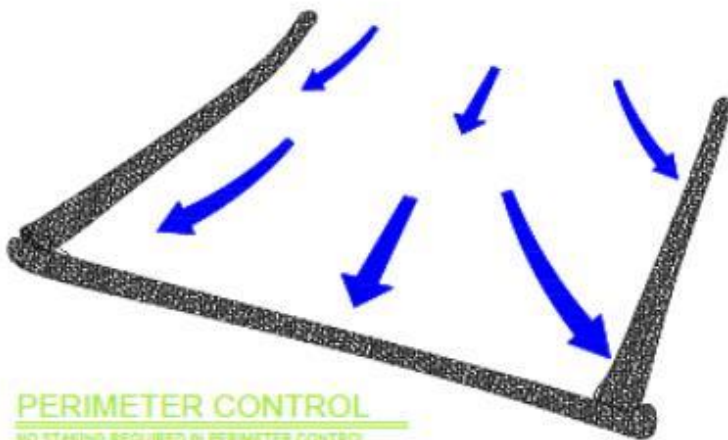

SILTWORM™

SILTWORM is a ready-to-use polyethylene, rolled filter filled with a proprietary blend of 100% recycled, kiln-dried wood fiber. Available in 9" or 12" diameter (standard), or 18" for custom order.

THE SILTWORM TECHNOLOGY ADVANTAGE

Installation of SILTWORM can be accomplished without disturbing the soil surface, thereby reducing erosion. It is easy to move and requires minimal staking allowing for easy access to worksites. The advantages equal cost savings by reducing labor, replacement and disposal costs.

PERIMETER CONTROL

NO STAKING REQUIRED IN PERIMETER CONTROL
APPLICATIONS IN WHICH GRADES DO NOT EXCEED 12%

For Typical Install:

Arrange around the perimeter of the site and perpendicular to storm water flow. Overlap adjacent by 6" to create a continuous line of defense.

Product Application Options:

- Perimeter Control
- Hard Surface Protection: including frozen ground and concrete
- Ditch Check Application
- Stockpile Application
- Protection of Tree Roots and Contain Mulch Beds
- Inlet Protection
- Slope Interruption
